-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 15 is rejected under 35 U.S.C. 103(a) as being unpatentable over Summers et al 5,937,841 in view of Hickman 2,394,856.

Summers shows a bow string release having an attached strap. However, it is not clear if the strap has a padded layer, and a substantially non-stretchable layer. One would be aware that a padded layer would be desirable for comfort, and a non-stretchable layer would be desirable to increase accuracy. For example, Hickman shows that a wrist strap may include two layers of material such as leather; leather would be considered soft padded material; and may

be "substantially" non-stretchable; "substantially" is a broad term that does not clearly define the characteristics of the material. Since one would recognize that the strap of a bow string release would be desirable if it is padded and substantially non-stretchable, it would have been obvious to one of ordinary skill in the art to use the strap of Hickman with the release of Summers.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 17-21 are rejected under 35 U.S.C. 102(b) as being anticipated by Summers et al 5,937,841.

Summers shows a strap for a bow string release having a buckle 16 with a pin at the first end, and a series of holes 14 to receive the pin at a second end. When the pin is engaged with the middle hole, the strap is considered to

be in a "semi-closed" relationship; the first end may be removed from the second end. Note that the claims are given the broadest reasonable interpretation, and description in the specification is not read into the claims.

Claims 1-14 are allowed.

Claims 16 & 23-27 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
